*Dr. Richard Ellenbogen was phenomenal he really is an artist of his craft. He knew exactly what I wanted after meeting me and made me feel very confident in his ability to deliver exactly what I wanted! I am only 3 weeks post op and I could not be happier with the results already; very natural, perfect size for my body, healed incredibly easy! I don't feel like the surgery changed my active lifestyle I am however still healing. Dr. Ellenbogen knew how important staying active was to me and took that into serious consideration but also knowing I wanted to feel beautiful and feminine! He was also great to talk too made me feel very at ease on the day of my surgery and post op. I would recommend.*
